#### **Very well organized setup**

The center looked pristine and the staff was very presentable and helpful. Was in and out in less than 10 mins. Had a bit of a trouble finding the place (be sure to read the location instructions in the appointment reminder, will definitely help), but once we found it, it was one of the best experiences I have had in some kind of a medical facility.

### **Interesting Technology!**

Good experience for a not-so-fun task. Technician was very friendly, explained everything that was going to be done. My appointment wasn't until 11am but they took me right in when I arrived at 10:15am. I did have to drive around several times to find it. Maybe if the directions stated that the office was at the back of the building...

### **Quick and Efficient**

The gal who conducted my scan was very friendly and efficient. She was clear about the instructions and what she needed me to do and I was in and out in about 20 minutes. My only feedback is instructions on how to find the office. The address is listed as a street where the actual door is not facing. The office is located on the south side of a large building. I would add that in the appointment instructions.

### **Very friendly!**

They were very nice and friendly...took me longer to find the right place than it did to get the service done. FYI, The office is located at the back of the building....so it's not directly on Collin McKinney. There were pictures on the wall of teeth that were kinda scary to look at, but other than that, it was a very clean and relaxing atmosphere, and the girls gave good directions, so it was a pleasant experience overall.

### **Happy Parent**

I had nothing but wonderful service from 3D Imaging! Before I had gotten off the phone with my Orthodontist (who made the actual appt) I had already received an email confirming my appointment time. They sent me a reminder email, too. Once we got there for our X-Rays, we signed a paper or 2 and within 5 minutes we were saying "Have a Great Day." and we were out of there. I just wish all Customer Service providers worked this way...
